

OrthoMagnets™

a brand new alternative to traditional orthodontics.

Annika Florkowski

Are you considering braces?

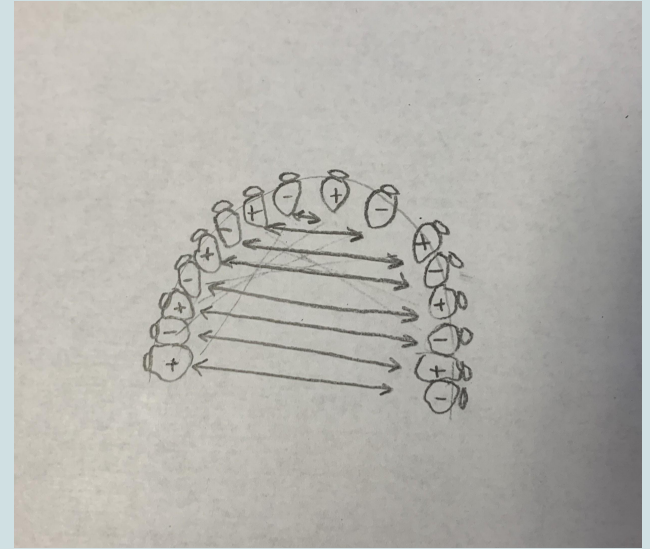

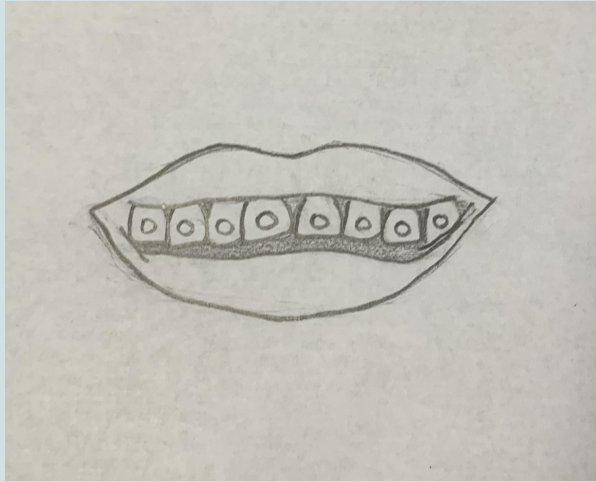

Consider
OrthoMagnets™!

OrthoMagnets™ uses magnet technology to correct and straighten your smile!

Perfect for
all ages!

Orthomagnets™ uses the north and south poles of magnets to bring teeth together in a correcting way.

Regular braces can be painful! The sharp edges of brackets leave cuts on the inside of your mouth, and food gets stuck in hard to reach places.

With OrthoMagnets™, say goodbye to painful cuts and awkward pieces of food in hard to reach places!

Ask your dentist
about OrthoMagnets™ today!

OrthoMagnets cost \$2000 per tooth and are only available in some regions of North America. The FDA has not yet approved OrthoMagnets. Use at your own risk.
